# SUN BUILDERS

## SOCIAL IMPACT REPORT

### WHAT DID WE TEACH?

In January, our crews partnered with Sun Builders on a small-scale deconstruction and salvage project in Madeira, Ohio. By choosing to deconstruct rather than demolish, Sun Builders made it possible for a Shaker-style cabinet set and an oven range to be carefully removed and redirected for resale at our Northside retail store. This partnership also provided our crews with an opportunity to learn jobsite safety protocols, proper tool selection, lifting techniques, load securement, and logistics. Rather than simple demolition, the work required selective disassembly, attention to fasteners and finishes, and safe handling of heavy, cumbersome items to preserve their value for resale.
