WILLIAMSBURG BOARD OF EDUCATION

SOCIAL IMPACT REPORT

WHAT DID WE TEACH?

During our recent deconstruction project with the Williamsburg, Ohio Board of Education, our team worked within an active school transition to carefully salvage materials from an older facility for reuse. Trainees removed classroom supplies, hardware, and equipment, while also preserving historic architectural features to be incorporated into the new school—connecting past and future through thoughtful deconstruction. A significant portion of the project focused on extracting sections of hardwood classroom and gym flooring, requiring precision, patience, and coordinated teamwork to ensure materials were recovered intact.
