WORKFORCE COUNCIL OF SOUTHWEST OHIO

SOCIAL IMPACT REPORT

WHAT DID WE TEACH?

The Workforce Council of Southwest Ohio recently partnered with Building Value to support the transition into their future OhioMeansJobs Center location while creating meaningful workforce development and sustainability impact along the way. Through this project, Building Value crews safely deconstructed interior materials including drywall, flooring, fixtures, and framing components, gaining hands-on experience in proper demolition, material handling, and job site safety procedures. Partnerships like this demonstrate how thoughtful deconstruction projects can simultaneously support economic opportunity, environmental sustainability, and community reinvestment throughout the Cincinnati region.
