WARSAW AVENUE

SOCIAL IMPACT REPORT

WHAT DID WE TEACH?

Building Value was hired by 8K and the City of Cincinnati to deconstruct a historic Warsaw Avenue building that was once home to the Deaf and Hard of Hearing Institute for Christian Education. Before work began, trainees learned how to safely shut off water and gas service, a critical first step on any job site. Crews then took the building down to the studs across three floors, removing plaster and lath from walls and ceilings, clearing out kitchens, bathrooms, wiring and plumbing, and cleaning out the basement. They also learned to work carefully around the building's original trim, molding, windows and doors, which stayed in place to preserve its historic character. Working in reverse gave trainees a firsthand look at how a building is put together, from its framing to its mechanical systems.

PROGRAM PARTICIPANTS

Maxwell Davis

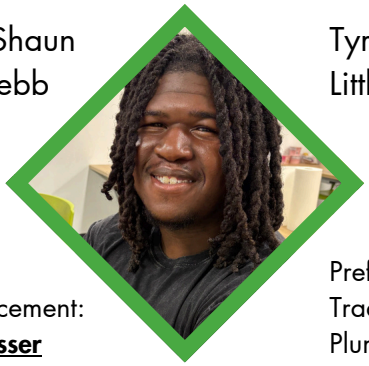

Job Placement: **Peck Hannaford + Briggs**

Rickhi Goodwin

Job Placement: **Valley Interiors**

K'Shaun Webb

Job Placement: **Messer**

Tyron Little

Preferred Trade: Plumbing

Niles Whatley

Preferred Trade: Carpentry

Lonzo Clark

Job Placement: **TJ Dyer**

Andrew Krause

Job Placement: **Nelson Stark**

Raphael Muyaya

Preferred Trade: HVAC

8 individuals trained in construction

66,000 pounds of materials saved from landfills
